

Adding Text

You can easily add a paragraph to your site by using the Text widget.

Note: this widget is ideal for adding a paragraph or block of information. If you want to add a large title or sub-title, select the Title widget. Alternatively, you can use the Text & Image widget if your paragraph includes an image.

To add a simple block of text, open the Widgets tab and search for the Text widget.

Text & Image

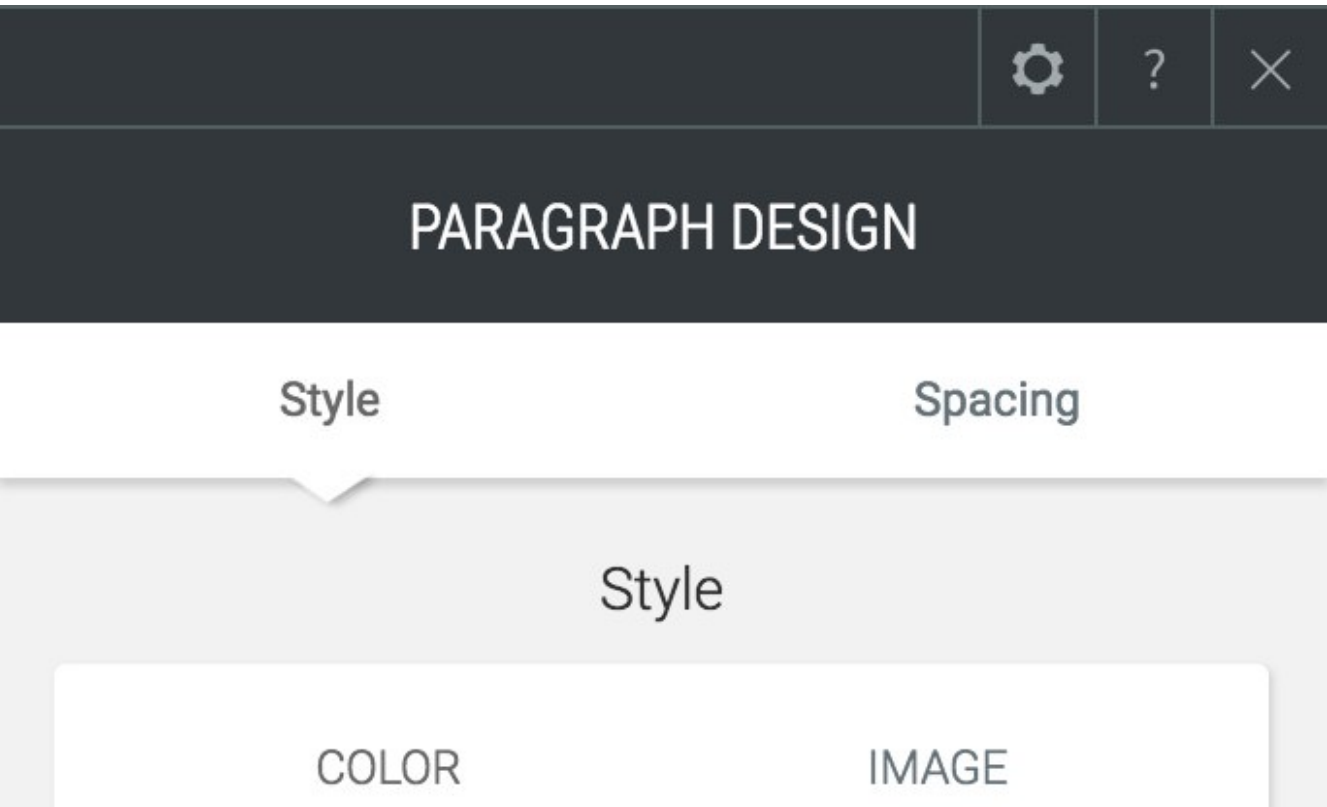

Drag this widget into the desired location of your editor and this will create a simple paragraph. You can click on the block to enter your text, as well as open the inline editor to make basic font style and size changes, alignment edits, etc.

Right clicking on the Text widget will open more options.

Click “Edit Design” to adjust style and spacing.
